Strategic Approach Toward Our Target Balance Sheet Structure

Basic Policy

Our commitment remains to prioritize a robust earnings base and strategic investments in growth. Simultaneously, our entire B/S is under review to make it leaner and achieve further capital efficiency.

Improve working capital turnover.

Constantly review our portfolio to accelerate growth.

Current Assets 

Liabilities 

Non-current Assets 

Net Assets 

Leaner Balance Sheet 

Consider debt financing to lower WACC, with attention to cash flow from operating activities.

Drive ROE improvement through disciplined capital control and an optimized equity scale.

Acceleration of Management Focused on Capital Efficiency

EDGE/Growth Areas

Drive operating profit by expanding a cycle of operating cash flow through proactive investments in growth.

ROIC

$$\frac{\text{NOPAT}}{\text{Invested Capital}}$$

Review invested capital in each business segment to prepare for segment-based ROIC management
(the transfer of the TBS Broadcast Center, etc.).

Media and Content Segment

Real Estate and Others Segment

Lower WACC by utilizing debt financing.

Utilization of Excess Cash

WACC

Strengthen shareholder returns (dividends, share buybacks, etc.) to optimize equity size.

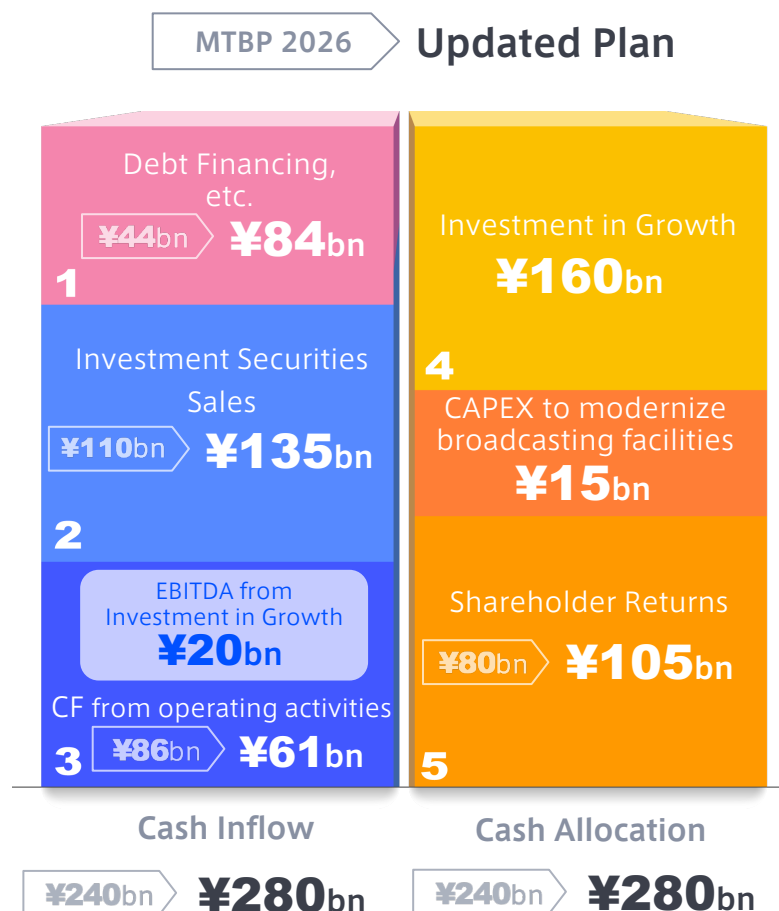

Overall B/S

Updated Capital Allocation

Positioning FY2026 as a phase to 'streamline the right side of the balance sheet' to overhaul capital allocation, driven by investment security sales exceeding targets and the shift to full-scale ROIC management in FY2027.

Cash Inflow

- 1 **Capital Optimization:** Reviewing invested capital by segment for WACC management ahead of the next Medium-Term Business Plan.
Financing Overhaul: Scaling debt for the Akasaka Entertainment City project from ¥40bn to ¥84bn.
- 2 **Security Divestment:** Scaling the MTBP 2026 target to ¥135bn, based on disposal to date.
Strategic Flexibility: Maintaining an agile approach in response to investment process in growth.
- 3 **Cash Flow from Operating Activities:** Revised target down to ¥61bn. Despite strong business performance, cash inflow is down-paced due to factors such as increased tax burdens from sales of shares and higher working capital requirement by sales growth.

Cash Allocation

- 4 **Total Investments in Growth to Date: ¥71.4bn**
 4-1. **Content IP Acquisition & Expansion**
 - Established SAND B
 - Acquired K contents and WACUL
 4-2. **Global Business Initiatives**
 - Alliance with Legendary Entertainment
 - Established JV with CJ ENM and U-NEXT HOLDINGS
 4-3. **Expansion of Lifestyle Business**
 - StylingLife Holdings became a wholly owned subsidiary
 - Developing the EduTainment segment
- 5 **Enhanced Shareholder Returns:**
Upscaling returns to ¥105bn in the 3-year total, reflecting the achievement of the MTBP 2026 targets ahead of schedule.

Key Points of Proactive Shareholder Returns in the MTBP 2026 Updated

- **Capital Discipline:** Managing invested capital and cost of capital to drive ROIC-based management.
- **Strategic Balance:** Achieving autonomous equity control by balancing investments in growth with shareholder returns, considering that investments in areas such as content IP require time to realize a consistent positive cash flow.
- **Value Enhancement:** While maintaining our existing dividend policy, expanding the return by 45 billion yen relative to the initial plan (25 billion yen increase from the November announcement), following a review of capital allocation. Enhancing both corporate value and shareholder interests through proactive returns.
